Ref: Professional Reference

I wish to provide a reference and testimonial for TruWorth and the development work they have undertaken for my company.

TouchNZ has been involved in Touch Kiosk software for the last six years and due to a progression of ideas, we as a company sent out a request via a Site Kiosk website for companies to tender to produce a new software design look and feel for our company. There were many companies that tendered but only one stood out as fully understanding our desires and being able to grasp the concept of what was required.

When you are dealing with an overseas company and people you have never met it is difficult to completely convey thoughts and ideas on paper. TruWorth was able to take a brief and develop a new software package that is totally within the scope of the brief, in fact the team is so good they extended my brief and made the product better than I could have dreamed of. TruWorth have been able to produce a touch screen kiosk information database system that now represents my company in a very professional way, software that can now be used in any country of the world without ongoing costly development work.

When new software is developed there are always teething problems and bugs to be fixed. It is extremely rare to have new software developed and working within schedule and without bugs. Not so with this team, they produced the project on time and within budget without any bugs. It is extremely hard to find a team like this, a truly professional Team.

The Director, Gaurav Mundra, and Senior Project Manager Yogesh Pant have been extremely professional in the whole process. Yogesh has developed a fantastic team around him and they are able to not only develop a complicated date retrieval system, but also able to incorporate ideas from us without any fuss. When you are dealing people who do not speak your native tongue it sometimes can be difficult to convey concepts. Not so with this team, they are an absolute pleasure to work with. So much so, that my plan now is to travel to meet these men and their team. Such is the relationship we have developed during the process.

I am more than happy to back this reference up at any time.
